FOR ALL THE PURPOSES OF A FAMILY PHYSIC THERE has long existed a public demand for an effective purgarive pill which could be relied on as sure and perfectly safe in its operation. This has been prepared to meet that demand, and an extensive trial of its virtues has conclusively shown with what success it accomplishes the purpose designed. It is easy to make a physical Pill, but not easy to make the best of all Pills—one which should have some of the objections but all the adventures.

clusively shown with what success it accomplishes the purpose designed. It is easy to make a physical P.LL, but not easy to make the best of all P.LLS—one which should have none of the objections, but all the advantages, of every other. This has been attempted here, and with what success we would respectfully submit to the public docision. It has been defortunate for the patient hitherto that almost every pargative medic ne is aerimonious and irritating to the bowels. This is not. Many of them produce so much griping pain and revulsion in the system as to more than counterbalance the good to be derived from them. These Fills produce no irritation or pain unless it arise from a previously existing obstraction or derangement in the bowels. Being purely vegetable, no harm can arise from their use in any quantity; but it is better that any medicine should be aken judic'ously. Minute directions for their use in the several diseases to which they are applicable are given on the box. Among the complaints which have been speedily cired by them we may mention, Liver Complaint, in its various forms of Jaundice, Indigestion, Languor and Loss of Appetite, Listlessness, Irritability, Billions Headache, Billious Fever, Fever and Ague, Pain in the Side and Loins; for, in truth, all these are but the consequence of diseased action in the liver. As an apperient, they afford prompt and sure relief in Costiveness, Plies, Cohe, Pyseniery, Humers, Scrofula and Scurvy, Colds, with sureness of the body, Ulcers, and impurity of the blood; in short, any and every case where a purgative is required.

They have also produced some singularly successful cures in Rheumatism, Gout, Propsy, Gravel, Krysipelas, Palpita thon of the Heart, Palus in the Back, Stomuch and Side.—They should be freely taken in the spring of the year, to purify the blood and, by their stimu ant action on the circulatory system, renovate the system for the change of seasons. An occasional does is advantageous, even though no astrous derangement exists; but unnoccesary For minute directions, see the wapper on the Box.

This remedy has won for itself such notariety for its cures
of every variety of Pulmonary disease, that it is entirely unnecessary to recount the evidences of its virtues in any com
munity where it has been employed. So wide its the field of
its usefulness, and so numerous the cases of its cures, that
almost every section of the country abounds in persuapublicly known, who have been restored from alarming and
even desperate diseases of the lungs by its use. When once
tried, its superiority over every other medicine is too apparent to escape observation, and where its virtues are known,
the public no longer hesitate what antidote to employ for the
distressing and dangerous affections of the pulmonary organs
which are incident to our climate. And not only in formidable attacks upon the lungs, but for the milder varieties of
